# HAZARD REPORTING - COMPLIANCE

***Proactive Hazard Identification, Reporting & Closure Action Management***

## HAZARD IDENTIFICATION

Enable employees and contractors to identify and report potential workplace hazards, helping organizations proactively recognize unsafe conditions and prevent incidents before they occur.

## ALERT NOTIFICATION

Receive automated alerts notifications about reported hazards, assigned responsibilities, approaching deadlines, and pending actions to ensure timely communication.

## INTERACTIVE DASHBOARD

Configure hazard reporting, review, risk assessment, approval, and closure processes according to organizational requirements and established safety management procedures.

## SEARCH & FILTER

Quickly locate specific hazard reports using search and filter options based on reporting date, hazard category, location, risk level, department, and action status.

## HAZARD CLASSIFICATION

Categorize reported hazards based on their nature, source, and type, allowing organizations to systematically organize hazard information and prioritize appropriate safety measures.

## COMPLIANCE MONITORING

Monitor hazard-related safety requirements, assigned actions, and compliance activities, helping organizations maintain systematic oversight of workplace safety obligations.

## CUSTOMIZALE WORKFLOW

Configure hazard reporting, review, risk assessment, approval, and closure processes according to organizational requirements and established safety management procedures.

## UNLIMITED USERS

Provide access to employees, contractors, supervisors, and safety professionals, enabling organization-wide participation in hazard identification and reporting activities.

**Hazard Reporting & Compliance Software** is a powerful digital solution designed to strengthen workplace safety through hazard identification, reporting, risk assessment, and corrective action management. It enables employees, contractors, and safety professionals to report unsafe conditions and potential hazards for timely action. With customizable hazard categories, real-time action tracking, interactive dashboards, and comprehensive reporting, QHSEalert helps improve hazard visibility, strengthen safety compliance, and prevent workplace incidents.
