

QUALITY SUITE

Control Raw Material to Finished Product Efficiently

CUSTOMIZED QC PLANNING

Quality control planning can be customized starting from raw material to finished product with sampling & testing criteria etc.

SHARE VIA EMAIL, WHATSAPP

The quality reports can be shared via email, WhatsApp and print. You can retrieve and share any report from past history instantly.

AUTO – MANUAL REQUESTS

Sampling and test requests can be generated either auto for continuous production or manually for batch production.

EXPORT DATA & DOWNLOAD REPORTS

Any data can be exported into an excel sheet instantly and any quality report can be downloaded easily.

CALIBRATION PLANNING

Auto-generated alert notification is sent to the user for due calibration. Evidence of calibration can be uploaded as compliance.

ELIMINATES HUMAN ERRORS

Human errors w.r.t. to the decision on results about approval/ rejection can be eliminated. The result status is indicated through colours.

INTERACTIVE DASHBOARD

The dashboard indicates performance data analysis in tables & interactive charts for easy interpretation.

SUPPLIER QUALITY PERFORMANCE

The real-time report of the supplier's quality performance is described with data & interactive charts.

Quality Suite software is a cloud-based application. You can customize quality control plans for raw materials, packing materials, in-process products, and finished products. Sampling & testing requests can be generated manually or automatically, and analysis reports can be shared instantly via email, WhatsApp and print. Interactive chart and dashboard data indicate real-time performance data. Human errors w.r.t. the decision of results about approve/ pass can be eliminated.
